PLATE 1: A ray traced image including reflections and shadows. (Courtesy of Sven Maerivoet.)

PLATE 2: Shows a screenshot from a 3D computer-based game. (Courtesy of High Moon Studios, Inc.)
PLATE 3: Screenshot of a paint system with drawing tools and menus. (Courtesy of Pixologic, Inc.)

PLATE 4: An enhanced view of the Mars landscape. (Courtesy of NASA/NSSDC/Mary A. Dale-Bannister, Washington University in St. Louis.)
PLATE 5: A video card from ATI Technologies. (Courtesy of ATI.)

PLATE 6: A complex OpenGL menu system. (Courtesy of Unigine.)
PLATE 7: A sphere reflecting off a shiny surface. (Courtesy of Sven Maerivoet.)

PLATE 8: The classic teapot, sphere, and jack on a table. (Courtesy of Sven Maerivoet.)
PLATE 9: A water fountain animation. (Courtesy of Philipp Crocoll.) Program available online.

PLATE 10: Part a) The wire-frame mesh model for a household appliance. Part b) A shaded version of the mesh model. (Courtesy of Lamont Gilkey.)
PLATE 11: A view of a fullerene molecule. (Courtesy of Dr. Koch/Lauher, SUNY.)

PLATE 12: A double helix model. ( Courtesy of Sven Maerivoet.)

PLATE 14: An image of terrain using mesh models for the mountains and hills and particles for the clouds. (Courtesy of Rob Hall.)
PLATE 15: An architectural drawing in three-point perspective.  
(Courtesy of Andrew King, Architectural Illustrations, Inc.)

PLATE 16: Three renderings of a model frog using shading models to suggest gold, silver, and copper.  
(Courtesy of Lutz Latta and Anto Matkovic)

PLATE 17: Light sources in a scene. (Courtesy of Unigine.)
PLATE 18: A chessboard showing marbleized texture, along with wood grain and metallic texture on chess pieces. (Courtesy of Sven Maerivoet.)

PLATE 19: Wrapping a texture map onto each octant of a billiard ball. (Courtesy of Sven Maerivoet.)
PLATE 20: A chrome environment map. (Courtesy of Eric Boissard.)

PLATE 21: Examples of chrome mapping. (Courtesy of L.Latta & P. Debevec.)

PLATE 22: An example of bump mapping.
PLATE 23: A cartoon rendering of an engine.  
(Courtesy of L. Molnar and J. Sun, The Ohio State University.)

PLATE 24: A non-photorealistic rendering.  
(Courtesy of Kontantinos Sakellis.)

(Courtesy of Tor Olav Kristensen, subcube.com. All images generated with POV-Ray.)
**PLATE 26:** A sphere whose model has been randomly perturbed.  
(Courtesy of Tor Olav Kristensen, subcube.com. All images generated with POV-Ray.)

**PLATE 27:** Successive subdivisions of a mesh model. Parts a)-c) Wireframe views. Part d)-f) Shaded views.  
(Courtesy of Jian Zhang.)
PLATE 28: A test for color blindness.
(Courtesy of Terrance L. Waggoner, O.D. Copyright owner Color Vision Testing Made Easy and the PIPIC Color Vision Tests.)

PLATE 29: CIE Chromacity Diagram. (Courtesy of TechMind.)
PLATE 30: Part a) A lava lamp mesh model with a box extent (OpenGL shading). Part b) A ray traced version of the image in Part a (Courtesy of Sven Maerivoet.)

PLATE 31: A scene ray traced to exhibit shadows. (Courtesy of Sven Maerivoet.)

PLATE 32: Ray tracing in progress: part preview and part final rendering. (Courtesy of Sven Maerivoet.)
PLATE 33: Part a) A ray traced CSG object. Part b) A ray traced CSG object; the intersection of a sphere with a BuckyBall. (Courtesy of Sven Maerivoet.)

PLATE 34: Two glass objects with reflection, refraction, and shadows. (Courtesy of Sven Maerivoet.)
PLATE 35: A ray traced image with shadows, textures and refraction.  
(Courtesy of Sven Maerivoet.)

PLATE 36: Iridescence viewed in a car’s window.  (Courtesy of Emmanuel Agu.)

PLATE 37: Various views of the extraordinary Mandelbrot Set.  (Courtesy of Anton Feenstra.)
